

INDIGESTION?

What choice do you have?

Popular Antacids & Drugs?...
...or GNLD's Betaine & Enzyme Digestive Aids?

Many people understand the importance of good nutrition and the role supplementation plays in better health and wellness.

However, so many products today make so many claims that you need to exercise your mind before you make the right choices for your body.

BREAKTHROUGH SCIENCE

Antacids and digestive aids are a multi-million dollar market, and from time-to-time, nearly every adult reaches for some type of antacid to relieve indigestion. However, most of these products do not address the cause of indigestion, they only treat or mask the symptoms. Informed consumers will choose a digestive aid that supports "pro-digestion" and not a product that simply attacks the symptoms.

As we age, or when we overeat, our bodies do not produce enough digestive enzymes to fully digest protein, fats and carbohydrates. The symptoms of incomplete digestion, in both the stomach and intestine, are bloating, gas and general discomfort to alleviate these problems, you want to choose a product that contains ingredients that support complete digestion of your food.

A proper digestive aid supplements the body's natural production of protein, fat and carbohydrate-digesting enzymes. Your body digests the foods you eat best when there are sufficient enzymes available for these vital processes.

Look for a product that contains amylases for carbohydrates, proteases for protein, and lipases for fat digestion. You need a supplement that promotes optimal digestion in the stomach and the intestine. Food is digested along the entire path of the digestive tract, and a comprehensive digestive aid will provide support through the entire process.

For many, it's important for a digestive supplement to contain lactase, to help digest lactose, milk sugar.

When it comes to what you want from a supplement to support optimal digestion, ask yourself if you want something that simply masks the symptoms or a product that attacks the cause.

Features and Benefits:	GNLD's Betaine & Enzyme Digestive Aids	Popular Antacids & Drugs

Contact Your Independent GNLD Distributor for more details:

GNLD products are available only from Independent GNLD Distributors – people who know and use the products themselves and who are therefore the very best people to talk about them. They are not available through normal retail outlets. If you find that, like so many others, you benefit from the GNLD products that you use, then you may wish to become a Distributor yourself. It can be a most enjoyable and financially rewarding activity.

GNLD International is a company that manufactures and sells natural, whole-food nutritional supplements based on what 'Nature' intended, and derived from the known foods within the human food-chain. Operating in over 50 countries world-wide, and with a 45-year history, GNLD is at the leading edge of nutritional science, and continues to set the pace in the development and marketing of products designed to help the body function at its peak. GNLD products are all "Based in Nature ... and Backed by Science!" In fact, our products are so good that we offer an immediate 30-day money-back guarantee to anyone who feels that our products do not meet the standards, or provide the benefits, claimed.
